

**Dictation, Transcription, Speech Recognition,
Core Measures & Coding Solutions**

Core Measure Solutions

Fusion CQM adds speed, accuracy and automation to the entire quality reporting process for optimal team performance.

The Fusion Suite™

What is the Fusion Suite?

The Fusion Suite is a series of healthcare software applications designed to collect robust documentation from providers, deliver better quality for patients, and optimize revenue management for the entire organization.

Dictation & Transcription, Speech Recognition, Clinical Documentation Improvement, Coding and Care Quality Management and Reporting.

Fusion CQM Core Measures Reporting

Fusion CQM is designed to provide you with the expert tools you need to help document, gather and report on quality objectives.

You already know that your organization provides quality healthcare. Documenting and gathering metrics to detail the quality healthcare that you provide is required for you to optimize your reimbursement from CMS and meet accreditation standards with The Joint Commission. Value-based purchasing initiatives will continue to expand and demand more time and focus from your quality staff for many years to come.

Dolbey has designed Fusion CQM™ as a browser based, intuitive tool that requires minimal integration and IT resources to implement. Your quality team can begin to take advantage of the powerful tools on day one. Fusion CQM adds speed, accuracy and automation to the entire quality reporting process for optimal team performance.

Features & Benefits

Fast Implementation

Fusion CQM requires minimal integration and IT resources to implement.

Data Validation

Fusion CQM provides data validation to prevent or alert you to possible rejections.

Automated Sampling

Fusion CQM provides automated random daily or weekly sampling to complete quarterly goals, without the need to upload data.

CMS & TJC Submission

Dolbey and Fusion CQM will submit your quality data to both CMS and The Joint Commission every quarter.

Concurrent Abstraction

Fusion CQM enables you to abstract your quality data when patients are discharged to provide the ability to implement better procedures while it still counts.

Analytic Reporting

Fusion CQM contains powerful reporting tools designed to help you identify areas for care quality improvement and improved documentation practices.

Innovative Survey Tools

Fusion CQM brings speed, accuracy and automation to the entire quality reporting process for peak team performance.

Enhanced Productivity

Fusion CQM utilizes skip-logic and collapsing fields in an easy-to-use screen to optimize abstractor productivity.

Testimonial

Don't just take our word for it...

"When we began using Dolbey's Fusion CQM, we had over 23 RNs spending all or part of their day reviewing charts for quality reporting. Today, we have 5 Health Information Analysts doing that job. We used to review charts weeks or months after the patient had been discharged; now we are reviewing charts one week or less after discharge which gives us a chance to identify areas of improvement and implement change much faster in our hospitals. It has been very successful."

Rhonda Crabtree
Organizational Efficiency Officer
Covenant Health System
Knoxville, Tennessee

Since 1914, Dolbey has been providing voice recording and document management solutions designed to help healthcare organizations improve workflow, boost productivity and increase profitability.

The Fusion Suite platform is Dolbey's line of software products that includes dictation, transcription, Best in KLAS speech recognition, core measure reporting and computer-assisted coding technologies. Together they deliver a 360 degree, end-to-end solution which creates more accurate reporting of critical data elements and improves documentation, reimbursement and patient care.
