Speech Recognition
Cloud-Based
Solutions

Use the power of speech to control your EMR. Save time while reducing clinician burnout, increasing EMR adoption and improving patient care.

The Fusion Suite™
Document your patient’s story right the first time.

Fusion Narrate® powered by nVoq™ leverages superior cloud-based speech recognition using recurrent neural network technology, providing exceptional accuracy and helping providers to hit the ground running with no initial training phase. Using a USB or wireless microphone, providers can dictate directly into any application and benefit from many of Dolbey’s already available flexible features, including CAPD, to assist in documentation workflow.

A simple, quick web-based install with numerous workflow enhancements coupled with the same service and stability Dolbey has always provided delivers the efficiency and productivity your healthcare organization demands.

- Recurrent neural network technology
- No on-site servers, simple web-based install
- Wireless microphone for iOS and Android
- Direct speech input with any application
- CAPD with Fusion DocCheck™ NLP Engine
- Vision-based voice commands
Additional Features

- Web-based user administration
- Application virtualization support
- Numerous medical specialty speech topics
- Automatic software updates
- Easy to configure voice commands for automation
- Streamlined user interface
- Speech optimization and learning services
- Customizable vocabulary and substitutions

- Advanced select and say navigation (‘No Connector’ requirements)
- Compatibility and configurable buttons with SpeechMike, PowerMic, Olympus microphones
- Web-based usage reports
- On-screen tablet controls
- Dictation mode with back-end speech and Fusion Narrate Text™ transcription integration
Since 1914, Dolbey has been providing voice recording and document management solutions designed to help healthcare organizations improve workflow, boost productivity and increase profitability.

The Fusion Suite platform is Dolbey’s line of award-winning software products that includes dictation, transcription, speech recognition, clinical documentation improvement and computer-assisted coding technologies. Together they deliver an end-to-end solution which creates more accurate reporting of critical data elements and improves documentation, reimbursement and patient care.
